DETAILED ACTION

Claims 57-76 are pending in this application.

Action Summary

1. The examiner acknowledges the cancellation of claims 1-3, 6, 15, 22, 24-27, 33, 37-39, 42, 43 and 45-56. Therefore, any and all objections and/or rejections directed to them are hereby withdrawn.

Statement of Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The claims are allowable over the cited prior art because the prior art does not teach, disclose nor make obvious a method of treating inflammatory bowel disease (IBD) by containing the diseased mucosa of the gastrointestinal tract with a therapeutic amount of a polysaccharide selected from xanthan gum and hydroxypropylmethylcellulose. The closest prior art reference Day (US 5,380,522) teaches a method of treating irritable bowel syndrome (IBS) with a composition comprising xanthan gum. The difference between the instant invention and the prior art is the condition treated. It would not have been obvious to use one to treat the other because the two conditions have different modes of discomfort. IBD is characterized by an inflammation of the large intestine and IBS is characterized by abdominal pain and changes in bowel habits. IBD should not be confused with IBS, which is less severe.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. Claims 57-76 are allowed.
